Overview

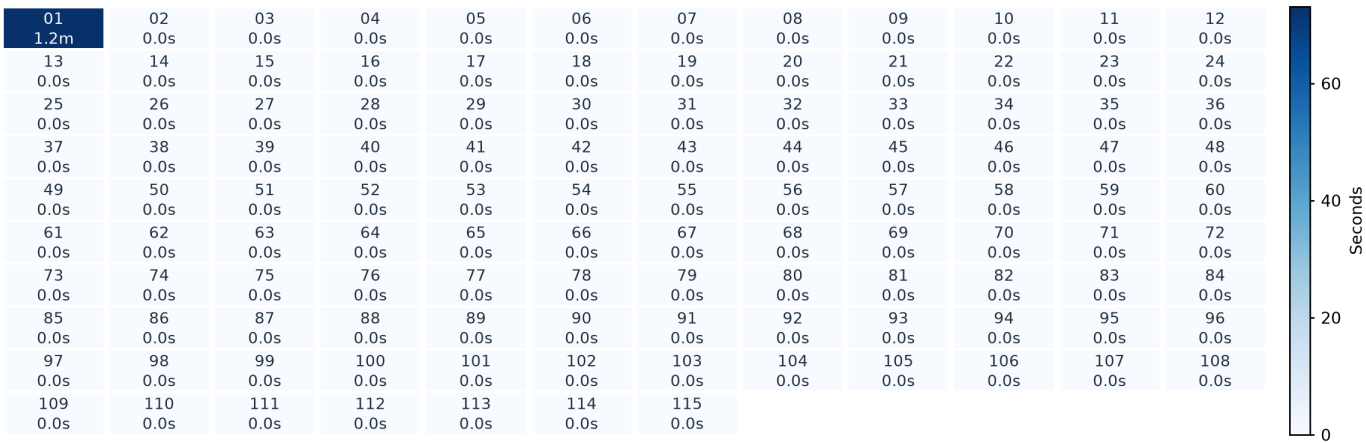

Findings by chart

Which charts have violations, warnings, or unresolved diagnostics?

Testing time by chart

Which charts used the most time? Cells match the chart grid above.

Read left to right, then down. Cell numbers match the chart sections; -- means timing unavailable.

Each cell is one chart; both grids follow chart-section order. Click a cell in the PDF for details. Colors show the highest observed finding kind, not a security or business-impact score. Hatching marks unfinished or unavailable testing, even when a finding was recorded. No findings means none in the completed sample, not exhaustive coverage. Testing time excludes dependency preparation.

Scan summary

Git comparison unavailable; no charts skipped using previous test results.
