109 0.0s	110 0.0s	111 0.0s	112 0.0s	113 0.0s	114 0.0s	115 0.0s					

Read left to right, then down. Cell numbers match the chart sections; -- means timing unavailable.

Each cell is one chart; both grids follow chart-section order. Click a cell in the PDF for details. Colors show the highest observed finding kind, not a security or business-impact score. Hatching marks unfinished or unavailable testing, even when a finding was recorded. No findings means none in the completed sample, not exhaustive coverage. Testing time excludes dependency preparation.

Scan summary

Git comparison unavailable; no charts skipped using previous test results.

Directory: /Users/emmad Doyle/projects/personal/hypothesis-helm/third_party/bitnami-charts

Started (Unix epoch): 1789854946

Elapsed (wall clock): 658.39 seconds

Chart testing: 634.74 seconds

Dependency preparation: 22.46 seconds (excluded from testing budgets)

Charts discovered: 115

Scan status: interrupted

Discovery complete: True

Unstarted charts: 112

Results record outcomes for the tested sample and selected checks.

Baseline-only, skipped, blocked, and incomplete charts retain their respective statuses.

Status counts

2 failed; 1 interrupted; 112 pending.

Settings

Filtering: True | Seed: 0 | Traversal: random

Chart timeout: 300.0 seconds | Workers: not recorded

Complete settings are retained in the JSON report.

Generated values use the configured input domains and any supported destination constraints.

Coverage excludes inputs outside these domains; supplied defaults are tested unchanged. The JSON report records constraints and unresolved mappings.

Disabled checks: HH2006

Errors

36 distinct diagnostics across 61 occurrences; 25 repeats grouped.

Diagnostics and their triggering inputs are grouped under each chart below.

Up to two examples per diagnostic and six fields per example are shown. Long values and diagnostics are shortened.

Full inputs, diagnostics, and remaining cases are retained in local run data.

Selected fields identify the inputs varied by the test. Causal attribution requires further investigation.

Charts

bitnami/airflow

Overview cell: 01

Status: failed | Attempts: 146

Audit findings: 1190. Full paths and template references are retained in the JSON report.

- HH2001 at \$.apiVersions: Undocumented values path (warning)
- HH2001 at \$.auth.existingSecret: Undocumented values path (warning)
- HH2001 at \$.auth.fernetKey: Undocumented values path (warning)

E028 (HH1101)

Invalid YAML in rendered output (manifest / violation). Severity: error. Inspect the failing YAML and template interpolation, including quoting and indentation.

[HH1101] Error: YAML parse error on apache/templates/svc.yaml: error converting YAML to JSON: yaml: line 26: found unexpected end of stream

Phase: \$.service.type | Status: failed

Changed overrides (used together):

- \$.service.type = "" (was "LoadBalancer")

[Full input and diagnostic](#)

E029 (HH1101)

Invalid YAML in rendered output (manifest / violation). Severity: error. Inspect the failing YAML and template interpolation, including quoting and indentation.

[HH1101] Error: YAML parse error on apache/templates/svc.yaml: error converting YAML to JSON: yaml: line 29: found unexpected end of stream

Phase: \$.service.sessionAffinity | Status: failed

Changed overrides (used together):

- \$.service.sessionAffinity = "" (was "None")

[Full input and diagnostic](#)

E030 (HH1101)

Invalid YAML in rendered output (manifest / violation). Severity: error. Inspect the failing YAML and template interpolation, including quoting and indentation.

[HH1101] Error: YAML parse error on apache/templates/svc.yaml: error converting YAML to JSON: yaml: line 30: found unexpected end of stream

Phase: \$.service.nodePorts.http | Status: failed

Changed overrides (used together):

- \$.service.nodePorts.http = "" (was "")

[Full input and diagnostic](#)

Phase: \$.service.nodePorts | Status: failed

Changed overrides (used together):

- \$.service.nodePorts.http = "" (was "")

[Full input and diagnostic](#)

2 additional occurrences are retained in the JSON report and chart artifacts.

E033 (HH1105)

Missing resource name (manifest / violation). Severity: error. Provide a name in each resource branch; ignore this check if your workflow intentionally uses generated names.

[HH1105] resource has no metadata.name

Phase: \$.serviceAccount.name | Status: failed

Changed overrides (used together):

- \$.serviceAccount.name = "0" (was "")

Manifest changes from rendered defaults (document and list order preserved):

- \$[2].metadata.name: "hypothesis-apache" -> 0
- \$[4].spec.template.spec.serviceAccountName: "hypothesis-apache" -> 0

[Full input and diagnostic](#)

Phase: \$.fullnameOverride | Status: failed

Changed overrides (used together):

- \$.fullnameOverride = "0" (was "")

Manifest changes from rendered defaults (document and list order preserved):

- \$[0].metadata.name: "hypothesis-apache" -> 0
- \$[1].metadata.name: "hypothesis-apache" -> 0
- \$[2].metadata.name: "hypothesis-apache" -> 0
- \$[3].metadata.name: "hypothesis-apache" -> 0
- \$[4].metadata.name: "hypothesis-apache" -> 0
- \$[4].spec.template.spec.serviceAccountName: "hypothesis-apache" -> 0

[Full input and diagnostic](#)

E034 (HH3001)

Template accesses a missing object (template / violation). Severity: error. Guard or default the parent object, or require it in the values schema.

[HH3001] Error: apache/templates/ingress.yaml:34:15 executing "apache/templates/ingress.yaml" at <.name>: nil pointer evaluating interface {}.name

Phase: \$.ingress | Status: failed

Changed overrides (used together):

- \$.ingress.enabled = true (was false)
- \$.ingress.extraHosts = [null]

[Full input and diagnostic](#)

E035 (HH3002)

Incompatible value type in template (template / violation). Severity: error. Align the template operation with the accepted input types, or narrow the schema.

```
[HH3002] Error: apache/templates/networkpolicy.yaml:11:16 executing
"apache/templates/networkpolicy.yaml" at <include
"common.names.namespace" .>: error calling include: apache/charts/common/templates/_names.tpl:64:65
executing "common.names.namespace" at
<63>: wrong type for value; expected string; got []interface {}
```

Phase: \$.namespaceOverride | Status: failed

Changed overrides (used together):

- \$.namespaceOverride = [null]

[Full input and diagnostic](#)

E036 (HH3003)

Undefined named template (template / violation). Severity: error. Check the helper name, its definition and dependency availability.

```
[HH3003] Error: apache/templates/svc.yaml:9:11 executing "apache/templates/svc.yaml" at <include
"common.names.fullname" .>: error calling
include: template: no template "common.names.fullname" associated with template "gotpl"
```

Phase: \$.tags | Status: failed
