Overview

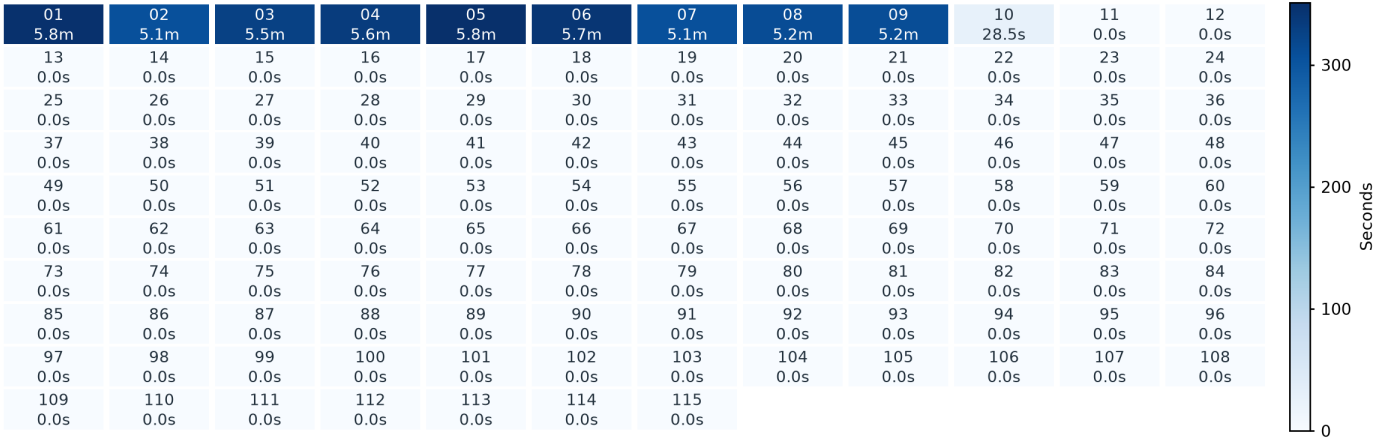

Findings by chart

Which charts have violations, warnings, or unresolved diagnostics?

Testing time by chart

Which charts used the most time? Cells match the chart grid above.

Read left to right, then down. Cell numbers match the chart sections; -- means timing unavailable.

Each cell is one chart; both grids follow chart-section order. Click a cell in the PDF for details. Colors show the highest observed finding kind, not a security or business-impact score. Hatching marks unfinished or unavailable testing, even when a finding was recorded. No findings means none in the completed sample, not exhaustive coverage. Testing time excludes dependency preparation.

Scan summary

Git comparison unavailable; no charts skipped using previous test results.

Directory: /Users/emmad Doyle/projects/personal/hypothesis-helm/third_party/bitnami-charts

Started (Unix epoch): 1789863671

Started (UTC): 2026-09-20T00:21:11.000+00:00

Finished (UTC): 2026-09-20T01:12:18.252+00:00 (estimated from recorded timing)

Run fingerprint (SHA-256): 251863348dfd60092c4726cde7b96b1d61e7fa756650e2ddf3feaaedd251ea4f

Elapsed (wall clock): 3067.25 seconds

Chart testing: 2974.70 seconds

Dependency preparation: 90.30 seconds (excluded from testing budgets)

Charts discovered: 115

Scan status: interrupted

Discovery complete: True

Unstarted charts: 105

Results record outcomes for the tested sample and selected checks.

Baseline-only, skipped, blocked, and incomplete charts retain their respective statuses.

Status counts

8 failed; 1 time-limit; 1 interrupted; 105 pending.

Settings

Filtering: True | Seed: 0 | Traversal: random

Chart timeout: 300.0 seconds | Workers: not recorded

Complete settings are retained in the JSON report.

Generated values use the configured input domains and any supported destination constraints.

Coverage excludes inputs outside these domains;

supplied defaults are tested unchanged. The JSON report records constraints and unresolved mappings.

Disabled checks: [HH2006](#)

Errors

25 distinct diagnostics across 35 occurrences; 10 repeats grouped.

Diagnostics and their triggering inputs are grouped under each chart below.

Up to two examples per diagnostic and six fields per example are shown. Long values and diagnostics are shortened.

Full inputs, diagnostics, and remaining cases are retained in local run data.

Selected fields identify the inputs varied by the test. Causal attribution requires further investigation.

Charts

[bitnami/airflow](#)

Overview cell: 01

Status: failed | Attempts: 113

Audit findings: 1190. Full paths and template references are retained in the JSON report.

- [HH2001](#) at `$.apiVersions``: Undocumented values path (warning)
- [HH2001](#) at `$.auth.existingSecret``: Undocumented values path (warning)
- [HH2001](#) at `$.auth.fernetKey``: Undocumented values path (warning)
- [HH2001](#) at `$.auth.jwtSecretKey``: Undocumented values path (warning)

- [HH2001](#) at `\$.auth.password`: Undocumented values path (warning)
- [HH2001](#) at `\$.auth.secretKey`: Undocumented values path (warning)
- 1184 additional audit findings in JSON.

E022 ([HH1109](#))

Invalid manifest field type (manifest / violation). Severity: error. Check the field named in Helm's decoding error and constrain its values to the required type.

[HH1109] Error: YAML parse error on airflow/charts/redis/templates/headless-svc.yaml: error unmarshaling JSON: while decoding JSON: json: cannot unmarshal object into Go struct field .metadata.annotations.x_[] of type string

Phase: \$.redis.sentinel.service.headless | Status: failed

Changed overrides (used together):

- \$.redis.sentinel.service.headless.annotations[""] = false
- \$.redis.sentinel.service.headless.annotations["x_[]"] = []
- \$.redis.sentinel.service.headless.extraPorts = []

[Full input and diagnostic](#)

[Chart artifacts](#)

[bitnami/apache](#)

Overview cell: 02

Status: failed | Attempts: 601

Audit findings: 245. Full paths and template references are retained in the JSON report.

- [HH2001](#) at `\$.affinity`: Undocumented values path (warning)
- [HH2001](#) at `\$.args`: Undocumented values path (warning)
- [HH2001](#) at `\$.automountServiceAccountToken`: Undocumented values path (warning)
- [HH2001](#) at `\$.autoscaling.enabled`: Undocumented values path (warning)
- [HH2001](#) at `\$.autoscaling.maxReplicas`: Undocumented values path (warning)
- [HH2001](#) at `\$.autoscaling.minReplicas`: Undocumented values path (warning)
- 239 additional audit findings in JSON.

Configuration rejections: 0 excluded; 0 adjusted and tested; 0 Helm verification renders (separate from manifest-test attempts).

The template rejected inputs admitted by the declared values schema; these remain reported failures.

E003 ([HH1101](#))

Invalid YAML in rendered output (manifest / violation). Severity: error. Inspect the failing YAML and template interpolation, including quoting and indentation.

[HH1101] Error: YAML parse error on apache/templates/deployment.yaml: error converting YAML to JSON: yaml: line 179: found unexpected end of stream

Phase: \$.htdocsConfigMap | Status: failed

Changed overrides (used together):

- \$.htdocsConfigMap = "" (was "")

[Full input and diagnostic](#)

E004 ([HH1101](#))

Invalid YAML in rendered output (manifest / violation). Severity: error. Inspect the failing YAML and template interpolation, including quoting and indentation.

```
[HH1101] Error: YAML parse error on apache/templates/deployment.yaml: error converting YAML to JSON:
yaml: line 31: did not find expected
', ' or ']'
```

Appendix: finding codes

HH codes identify finding categories. E001-style numbers identify individual diagnostics within this report.

Severities below are defaults; configured overrides are shown with the findings above.

HH1001 - Unclassified template failure

Default severity: error | Category: unclassified | Evidence type: diagnostic

Helm template exits unsuccessfully without a recognized diagnostic.

Suggested action: Inspect the Helm diagnostic and reproducer; the exit alone does not establish a chart defect.

HH1011 - Rendered output cannot be encoded as JSON

Default severity: error | Category: unclassified | Evidence type: diagnostic

Manifest processing reports a JSON representation failure.

Suggested action: Inspect YAML tags and parser support to determine whether the failure comes from an unsupported value or a chart defect.

HH1101 - Invalid YAML in rendered output

Default severity: error | Category: manifest | Evidence type: violation

The YAML parser rejects rendered output, or Helm reports a YAML parse error.

Suggested action: Inspect the failing YAML and template interpolation, including quoting and indentation.

HH1109 - Invalid manifest field type

Default severity: error | Category: manifest | Evidence type: violation

Helm parses the YAML but cannot decode a field into its required manifest type.

Suggested action: Check the field named in Helm's decoding error and constrain its values to the required type.

HH2001 - Undocumented values path

Default severity: warning | Category: values | Evidence type: warning

The audit finds a values path with no matching schema declaration.

Suggested action: Document the path in values.schema.json, including its accepted values.

HH2002 - Unspecified values type

Default severity: warning | Category: values | Evidence type: warning

A schema path declares no type, enum or const.

Suggested action: Declare the accepted type or a finite set of values.

HH2003 - Missing values description

Default severity: info | Category: values | Evidence type: warning

A typed schema path has no description.

Suggested action: Describe the field's behavior and any requirements shared with other fields.

HH2004 - No supplied default for a values path

Default severity: warning | Category: values | Evidence type: warning

A discovered path is absent from the original values file.

Suggested action: Supply a default or document when users must provide the field. Render the relevant configurations to check its requirements.

HH2006 - Opaque object schema

Default severity: warning | Category: values | Evidence type: warning

An object permits unspecified entries without named fields, patterned fields or a typed map-value schema.

Suggested action: Describe fields with properties, patternProperties or typed additionalProperties. Ignore

[HH2006](#) for intentional free-form configuration; tests still sample those values.

HH3001 - Template accesses a missing object

Default severity: error | Category: template | Evidence type: violation

Helm reports a nil pointer while evaluating a template field.

Suggested action: Guard or default the parent object, or require it in the values schema.
