Source commit

[6a8cccf3c29a1faabf0c34c8276a09ed14f3c5b3](https://github.com/bitnami/charts/commit/6a8cccf3c29a1faabf0c34c8276a09ed14f3c5b3)

Versions

Hypothesis 6.168.0; hypothesis-helm 0.1.0

Working directory

```
/Users/emmadoyle/projects/personal/hypothesis-helm
```

Scan command

```
hypothesis-helm test third_party/bitnami-charts --filter --disable-codes HH2006  
--jobs 8 --chart-timeout 180s --scan-timeout 200m --timeout 50 --max-examples 5  
--seed 0 --shard none --max-mutations 96 --pca-samples 8 --pca-timeout 60s  
--artifact-dir .cache/hypothesis-helm/bitnami-runs --report  
docs/reports/bitnami.md --log-color
```

Overview

Findings by chart

Testing time by chart

- Violation
- Warning
- Diagnostic
- No findings
- Incomplete
- Not tested
- Testing unfinished / unavailable

Read left to right, then down. Cell numbers match the chart sections; -- means timing unavailable.

Each cell is one chart; both grids follow chart-section order. Click a cell in the PDF for details. Colors show the highest observed finding kind, not a security or business-impact score. Hatching marks unfinished or unavailable testing, even when a finding was recorded. No findings means none in the completed sample, not exhaustive coverage. Testing time excludes dependency preparation. Plot guide: [Overview matrices](#).

Scan summary

Git comparison unavailable; no charts skipped using previous test results.

Directory: /Users/emmad Doyle/projects/personal/hypothesis-helm/third_party/bitnami-charts

Started (Unix epoch): 1790199081

Started (UTC): 2026-09-23T21:31:21.000+00:00

Finished (UTC): 2026-09-24T00:35:21.716+00:00

Run fingerprint (SHA-256): 0e8d71cca2d59c213c1af4111496708467ace8c3ea3b08995ba5a08ff1d0af96

Versions: Hypothesis 6.168.0; hypothesis-helm 0.1.0

Elapsed (wall clock): 9766.64 seconds

Chart testing: 9354.20 seconds

Dependency preparation: 395.42 seconds (excluded from testing budgets)

Charts discovered: 115

Manifest test attempts: 2741

Scan status: interrupted

Discovery complete: True

Unstarted charts: 67

Results record outcomes for the tested sample and selected checks.

Baseline-only, skipped, blocked, and incomplete charts retain their respective statuses.

Status counts

38 time-limit; 8 failed; 1 skipped-library; 1 interrupted; 67 pending.

Settings

Filtering: True | Seed: 0 | Traversal: random

Chart timeout: 180.0 seconds | Workers: 8

Complete settings are retained in the JSON report.

Command working directory: /Users/emmad Doyle/projects/personal/hypothesis-helm

Scan command:

```
hypothesis-helm test third_party/bitnami-charts --filter --disable-codes HH2006 --jobs 8 --chart-timeout 180s
--scan-timeout 200m --timeout 50 --max-examples 5 --seed 0 --shard none --max-mutations 96 --pca-samples 8
--pca-timeout 60s --artifact-dir .cache/hypothesis-helm/bitnami-runs --report docs/reports/bitnami.md
--log-color
```

Generated values use the configured input domains and any supported destination constraints. Coverage excludes inputs outside these domains; supplied defaults are tested unchanged. The JSON report records constraints and unresolved mappings.

Disabled checks: [HH2006](#)

Errors

29 distinct diagnostics across 43 occurrences; 14 repeats grouped.

Diagnostics and their triggering inputs are grouped under each chart below.

Up to two examples per diagnostic, with six fields each. Long values are shortened; YAML parser details stay in run data.

Full inputs, diagnostics, and remaining cases are retained in local run data.

Selected fields identify the inputs varied by the test. Causal attribution requires further investigation.

Charts

[bitnami/airflow](#)

All vertices and connections are retained.
Connections indicate potential influence, not proven causality.

[Topology: bitnami/airflow](#)

bitnami/airflow
0 measured changes; 0 pairs (unavailable)

Field interactions

Uncontrolled renderer effects: controlled renderer does not support native effect: lookup

[Sensitivity: bitnami/airflow](#)

Overview cell: [01](#)

Status: time-limit | Attempts: 22

No failing test cases were recorded. The time limit was reached before testing finished.

Coverage: sampled values paths; full interaction coverage was not established.

E013 ([HH1101](#))

Invalid YAML in rendered output (manifest / violation). Severity: **error**. Inspect the failing YAML and template interpolation, including quoting and indentation.

Status: failed | Phase:

```
$extraPodSpec.affinity.nodeAffinity.preferredDuringSchedulingIgnoredDuringExecution[*].preference
```

Changed overrides (used together):

```
-$extraPodSpec.affinity.nodeAffinity.preferredDuringSchedulingIgnoredDuringExecution.__hypothesis_key__.preference = {}
```

Absent from overrides:

```
$extraPodSpec.affinity.nodeAffinity.preferredDuringSchedulingIgnoredDuringExecution["*"].preference
```

Defaults may still apply.

Renderer random inputs (replay tape in artifacts):

E014 ([HH1101](#))

Invalid YAML in rendered output (manifest / violation). Severity: **error**. Inspect the failing YAML and template interpolation, including quoting and indentation.

Status: failed | Phase: `$.extraPodSpec.initContainers[*].envFrom[*].configMapRef.name`

Changed overrides (used together):

-

`$.extraPodSpec.initContainers.__hypothesis_key__.envFrom.__hypothesis_key__.configMapRef.name = null`

Absent from overrides:

```
$.extraPodSpec.initContainers["*"].envFrom["*"].configMapRef.name
```

Defaults may still apply.

Renderer random inputs (replay tape in artifacts):

[bitnami/apisix](#)

All vertices and connections are retained.
Connections indicate potential influence, not proven causality.

[Topology: bitnami/apisix](#)

Overview cell: [03](#)

Status: time-limit | Attempts: 11

No failing test cases were recorded. The time limit was reached before testing finished.

Coverage: sampled values paths; full interaction coverage was not established.

Audit findings: 344. Full paths and template references: [JSON](#).

bitnami/apisix
0 measured changes; 0 pairs (unavailable)

Uncontrolled renderer effects: controlled renderer does not support native effect: lookup

[Sensitivity: bitnami/apisix](#)

[bitnami/appsmith](#)

All vertices and connections are retained.
Connections indicate potential influence, not proven causality.

[Topology: bitnami/appsmith](#)

Overview cell: [04](#)

Status: time-limit | Attempts: 18

No failing test cases were recorded. The time limit was reached before testing finished.

Coverage: sampled values paths; full interaction coverage was not established.

Audit findings: 543. Full paths and template references: [JSON](#).

bitnami/appsmith
0 measured changes; 0 pairs (unavailable)

Uncontrolled renderer effects: controlled renderer does not support native effect: lookup

[Sensitivity: bitnami/appsmith](#)

[bitnami/argo-cd](#)

All vertices and connections are retained.
Connections indicate potential influence, not proven causality.

bitnami/argo-cd
0 measured changes; 0 pairs (unavailable)

Uncontrolled renderer effects: controlled renderer does not support native effect: lookup

[Topology: bitnami/argo-cd](#)

[Sensitivity: bitnami/argo-cd](#)

Overview cell: [05](#)

Status: time-limit | Attempts: 11

No failing test cases were recorded. The time limit was reached before testing finished.

Coverage: sampled values paths; full interaction coverage was not established.

Audit findings: 1251. Full paths and template references: [JSON](#).

[bitnami/argo-workflows](#)

All vertices and connections are retained.
Connections indicate potential influence, not proven causality.

bitnami/argo-workflows
0 measured changes; 0 pairs (unavailable)

Uncontrolled renderer effects: controlled renderer does not support native effect: lookup

[Topology: bitnami/argo-workflows](#)

[Sensitivity: bitnami/argo-workflows](#)

Overview cell: [06](#)

Status: failed | Attempts: 62

Coverage: generated path tests. Finite interaction coverage was unavailable: Cannot enumerate the input domain: permutations need closed objects at (); set additionalProperties: false. The sampled paths do not establish N-way coverage.

Audit findings: 452. Full paths and template references: [JSON](#).

- [HH2001](#) at \$.clusterDomain: Undocumented values path (warning)

E015 ([HH1101](#))

Invalid YAML in rendered output (manifest / violation). Severity: **error**. Inspect the failing YAML and template interpolation, including quoting and indentation.

Status: failed | Phase: \$.mysql.primary.extraPodSpec.containers

Changed overrides (used together):

- \$.mysql.enabled = true (was false)
- \$.mysql.primary.extraPodSpec.containers = []

Native renderer fallback; exact random replay unavailable: controlled renderer does not support native effect: lookup

E016 (HH1101)

Invalid YAML in rendered output (manifest / violation). Severity: **error**. Inspect the failing YAML and template interpolation, including quoting and indentation.

Status: failed | Phase: `$.mysql.primary.extraPodSpec.containers[*].lifecycle.postStart.exec.command`

Changed overrides (used together):

- `$.mysql.enabled = true` (was false)

- `$.mysql.primary.extraPodSpec.containers.__hypothesis_key__.lifecycle.postStart.exec.command = null`

Absent from overrides:

```
$.mysql.primary.extraPodSpec.containers["*"].lifecycle.postStart.exec.command
```

Defaults may still apply.

Native renderer fallback; exact random replay unavailable: controlled renderer does not support native effect: lookup

E017 (HH1101)

Invalid YAML in rendered output (manifest / violation). Severity: **error**. Inspect the failing YAML and template interpolation, including quoting and indentation.

Status: failed | Phase: `$.mysql.primary.extraPodSpec.securityContext.windowsOptions.runAsUserName`

Changed overrides (used together):

- `$.mysql.enabled = true` (was false)

- `$.mysql.primary.extraPodSpec.securityContext.windowsOptions.runAsUserName = null`

Native renderer fallback; exact random replay unavailable: controlled renderer does not support native effect: lookup

E018 (HH1101)

Invalid YAML in rendered output (manifest / violation). Severity: **error**. Inspect the failing YAML and template interpolation, including quoting and indentation.

Status: failed | Phase: `$.mysql.primary.extraPodSpec.volumes[*].projected.sources[*].secret.items`

Changed overrides (used together):

- `$.mysql.enabled = true` (was false)

- `$.mysql.primary.extraPodSpec.volumes.__hypothesis_key__.projected.sources.__hypothesis_key__.secret.items = null`

Absent from overrides:

```
$.mysql.primary.extraPodSpec.volumes["*"].projected.sources["*"].secret.items
```

Defaults may still apply.

Native renderer fallback; exact random replay unavailable: controlled renderer does not support native effect: lookup

E026 (HH1109)

Invalid manifest field type (manifest / violation). Severity: **error**. Check the field named in Helm's decoding error and constrain its values to the required type.

```
[HH1109] Error: YAML parse error on argo-workflows/templates/configmap.yaml: error unmarshaling JSON: while decoding JSON: json: cannot unmarshal object into Go struct field .metadata.annotations.spec of type string
```

Status: failed | Phase: `$.commonAnnotations.spec.initContainers[*].lifecycle.preStop.httpGet.path`

Changed overrides (used together):

- `$.commonAnnotations.spec.initContainers.__hypothesis_key__.lifecycle.preStop.httpGet.path = null`

Absent from overrides:

```
$.commonAnnotations.spec.initContainers["*"].lifecycle.preStop.httpGet.path
```

Defaults may still apply.

Native renderer fallback; exact random replay unavailable: controlled renderer does not support native effect: lookup

E027 (HH3002)

Incompatible value type in template (template / violation). Severity: **error**. Align the template operation with the accepted input types, or narrow the schema.

```
[HH3002] Error: argo-workflows/charts/mysql/templates/networkpolicy.yaml:72:69 executing
"argo-workflows/charts/mysql/templates/networkpolicy.yaml" at <$value.port>: can't evaluate field port in
type interface {}
```

Status: failed | Phase: `$.mysql.primary.service.extraPorts`

Changed overrides (used together):

- `$.mysql.enabled = true (was false)`

- `$.mysql.primary.service.extraPorts = [{"aaaa": [], "0aoaaa": {"aa\raa": {"g4aa": false, "Qaaa": {"Wiaa:aaaaaaaaYaaaaaaaaa": false}, "a`aV": null}, "": [], " a"... [value shortened]`

Appendix: graph structure

Compiler graph structure: 115 of 115 report charts

Graph size

Graph connectivity

[Published compiler graph invariants](#)

Published graph measurements are available for 115 of 115 report charts. Each point represents one chart. Plot guide: [Graph structure metrics](#).

Appendix: plot guide

Overview matrices

Each numbered cell links to one chart. The left matrix shows findings or test status; the right shows recorded testing time. A dash means no timing was recorded. Incomplete and untested charts have not passed.

Chart topology

Vertices represent values paths, branch conditions, templates and manifest fields. Connections show the relationships the compiler could establish between them. Rendered fields, when available, describe the measured baseline. An absent connection does not prove independence when analysis is incomplete.

Field interactions

Both axes use the field numbers in the chart's sensitivity appendix entry, linked from its plot caption. Each measured cell compares changing two fields together with changing each separately from the same baseline. Manifests are encoded as path-and-value indicators, including empty containers. The color measures the sum of absolute differences in $f(ij) - f(i) - f(j) + f(0)$. A larger value means a stronger interaction for those particular changes; zero means no interaction was measured. Blank cells are unmeasured, not zero. These measurements describe sampled changes, not all possible field values or bug counts.

Graph structure metrics

Each point represents one chart with published graph measurements. The upper panel compares vertices with connections. The lower counts independent loops after ignoring connection direction: connections minus vertices plus disconnected groups. Parallel connections count separately. The axes compress large values while retaining zero. These counts describe graph structure, not execution loops, runtime or the number of defects.

Appendix: sensitivity field keys

Both heatmap axes use the same field numbers for each chart.

Appendix: finding codes

HH codes identify finding categories. Numbered E entries, when present, identify recorded diagnostics. Severities below are defaults; configured overrides are shown with the findings above.

HH1101 - Invalid YAML in rendered output

Default severity: **error** | Category: manifest | Evidence type: violation

The YAML parser rejects rendered output, or Helm reports a YAML parse error.

Suggested action: Inspect the failing YAML and template interpolation, including quoting and indentation.

HH1105 - Missing resource name

Default severity: **error** | Category: manifest | Evidence type: violation

The resource fails the tool's nonempty metadata.name contract.

Suggested action: Provide a name in each resource branch; ignore this check if your workflow intentionally uses generated names.

HH1108 - Kubernetes schema validation failed

Default severity: **error** | Category: manifest | Evidence type: violation

The configured Kubernetes validator rejects the output.

Suggested action: Use the validator's field path and expected type to check the template and input schema.

HH1109 - Invalid manifest field type

Default severity: **error** | Category: manifest | Evidence type: violation

Helm parses the YAML but cannot decode a field into its required manifest type.

Suggested action: Check the field named in Helm's decoding error and constrain its values to the required type.

HH2001 - Undocumented values path

Default severity: **warning** | Category: values | Evidence type: warning

The audit finds a values path with no matching schema declaration.

Suggested action: Document the path in values.schema.json, including its accepted values.

HH2004 - No supplied default for a values path

Default severity: **warning** | Category: values | Evidence type: warning

A discovered path is absent from the original values file.

Suggested action: Supply a default or document when users must provide the field. Render the relevant configurations to check its requirements.

HH2006 - Opaque object schema

Default severity: **warning** | Category: values | Evidence type: warning

An object permits unspecified entries without named fields, patterned fields or a typed map-value schema.

Suggested action: Describe fields with properties, patternProperties or typed additionalProperties. Ignore [HH2006](#) for intentional free-form configuration; tests still sample those values.

HH3002 - Incompatible value type in template

Default severity: **error** | Category: template | Evidence type: violation

Helm reports a wrong value type, a field unavailable on a type, or an unsupported range operand.

Suggested action: Align the template operation with the accepted input types, or narrow the schema.

HH3003 - Undefined named template

Default severity: **error** | Category: template | Evidence type: violation

Helm reports that a called named template is not defined.

Suggested action: Check the helper name, its definition and dependency availability.
